## AN UNEXPECTED JOURNEY

The 407.48 carat modified shield step-cut yellow diamond is suspended beneath 229.52 carats of cascading, strikingly white diamonds. Priced at US\$55 million

## Exquisite Treasure

CERTIFIED IN THE GUINNESS WORLD RECORDS AS THE most valuable necklace in the world, this stunning 637-carat **MOUAWAD** L'Incomparable Diamond Necklace is adorned with the Incomparable Diamond – the world's largest internally flawless diamond – which stole the show at the recent Doha Jewellery & Watch Exhibition where it made its global debut. The beautiful Incomparable Diamond, in its rough state weighing 890 carats, was first discovered in 1980 in the Democratic Republic of Congo, by a little girl who found the diamond in a rubble pile of kimberlite that was separated because it was considered to be too bulky to possess any diamonds. The diamond eventually made its way into the hands of renowned diamond expert Marvin Samuels, who diligently spent four years supervising cutting the stone into its present flawless form.
