### SLENDER ELEGANCE

Watches are one of those timeless gifts and Piaget has just the one for your dad with its *Piaget Altiplano Date*. Defined by its pure aesthetics, this timepiece has the world's thinnest automatic movement, at just 3mm, making it not only light on the wrist, but also an interesting conversation topic. Housed in a record-breaking 6.36mm rose gold case, this elegant watch has its date displayed at 9 o'clock and the small seconds at 5 o'clock. Within the crystal caseback are a variety of movements graced with finishing touches like circular Côtes de Genève, bevelled bridges and a dedicated index-assembly, proving that this slender masterpiece doesn't compromise on the superior attributes Piaget is known for.
