

LAVA

Hot rocks

Inspired by earth's unstoppable power and energy, the Lava collection is an explosion of brilliance capturing the alluring moment when molten rock ruptures from deep within the earth's core. The result—a collection of exquisitely hand-crafted pieces of 18K rose gold, citrines and black & white diamonds meticulously forged and randomly layered together to form a powerfully frenetic lava motif.

Just as diamonds are shaped and formed for ages under great pressure to become perfect crystals of hardness and beauty, the Lava collection has been wrought from the depths of imagination to capture the power and glory of nature.
